

Map Basics: Visualizing

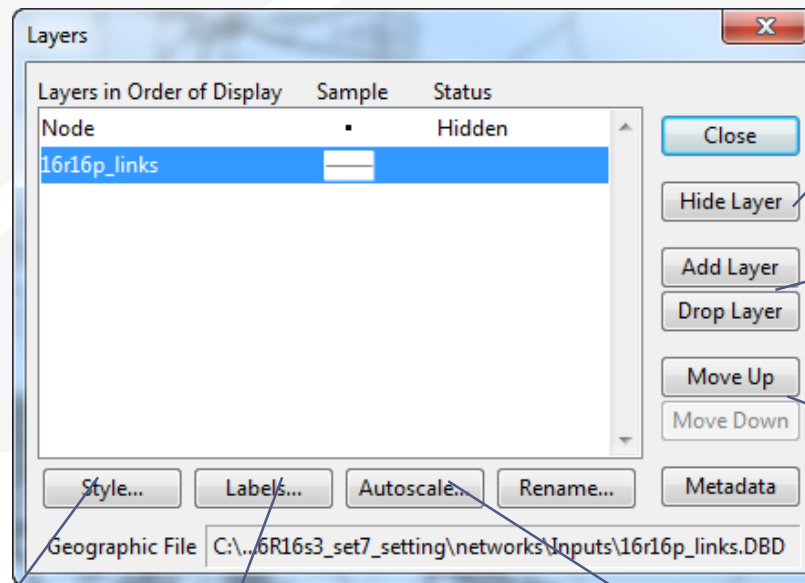

Working with Layers

- Start by opening a map or a geographic (dbd) layer file
 - » Opening a layer will create a new map and add the layer
 - » Opening a map will load all saved layers, settings, etc.
- Access layers with the layers dialog box ()

Working with Layers

- The Layers Dialog ()

Hide/show a layer

Add/Drop layers

Re-order layers

Change a layer style

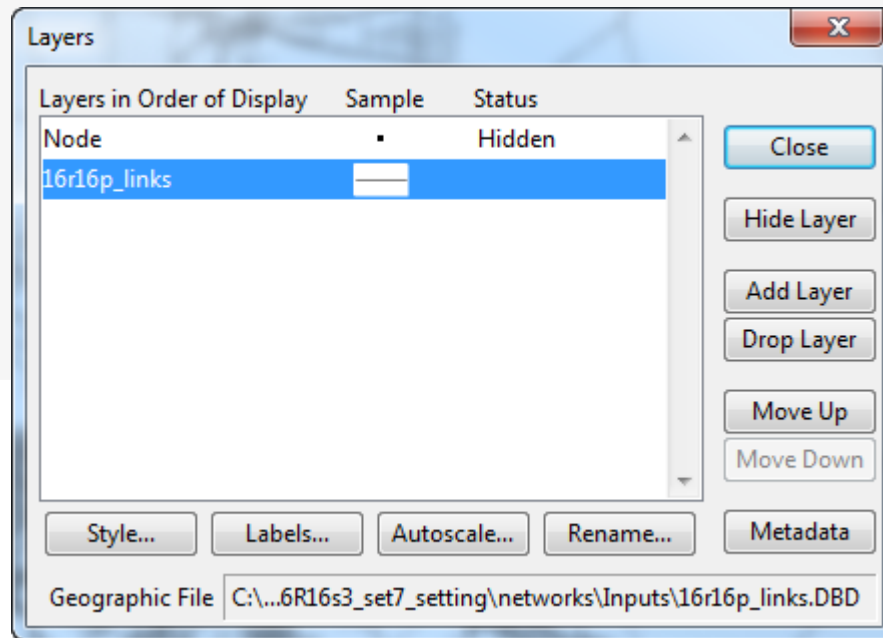

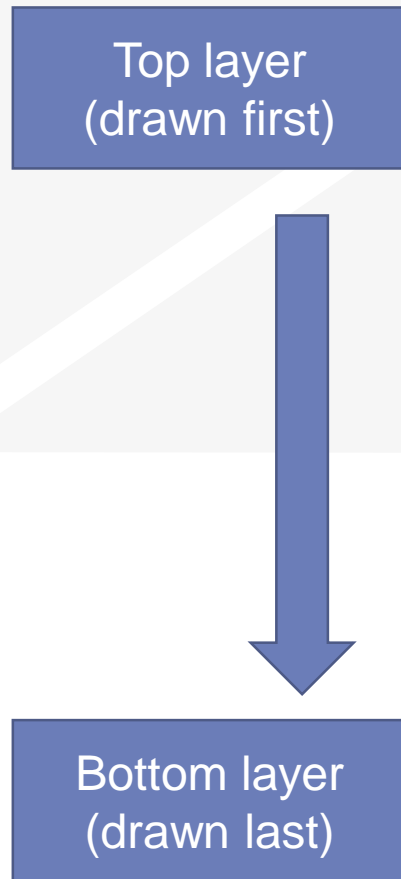

Add/edit labels

Automatically show/hide layers as certain scales

Working with Layers

- Layers are drawn from TOP to BOTTOM

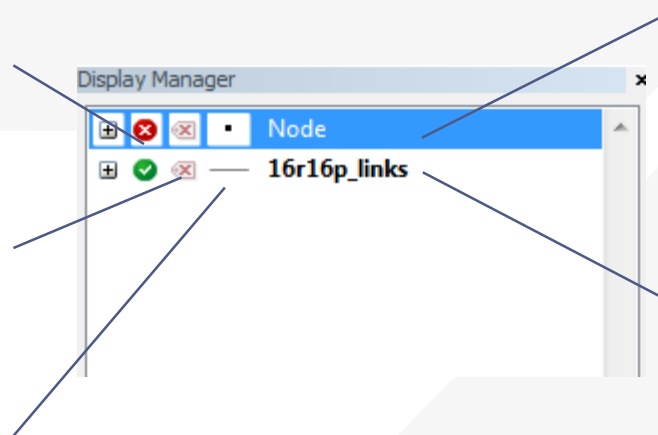

Display Manager

- Activate from Map → Display Manager
- Quick access to layers, settings, etc.
 - » Right-click for more settings, including *make working layer*

Hide/show a layer

Add/edit labels

Change a layer style

Node layer is **NOT** active

Bold text: links layer is active
